

The Faculty cordially invite you to this event of mutual interest and great value in career building of our young graduates/ students. This is the great opportunity for all the intellectuals, industry professionals and students alike to take maximum benefit from this "Open House".

All the Engineering programs are accredited by Pakistan Engineering Council (PEC) according to Washington accord and technology programs are accredited by National Technology Council (NTC) Pakistan according to Sydney accord. The syllabus is continuously modified as per the guidelines of PEC / HEC / NTC and to meet the requirements of industry due to modernization. FET is organizing the "Open House" regularly since 2010, to encourage the students for their final year practical work / project by presenting it to industry, for academia and industry interaction, for exposure of students with industry and in job hunt to students.

FET is planning the open house for the motivation of students. The 12th Open house will be conducted on July 14th, 2021 at Quaid e Azam auditorium at International Islamic University in Faisal Mosque Campus.

Come and join us on this event featuring the following:

1) Display of R&D, Engineering and Technology Projects

The projects from our final year students of all Engineering and Technology Programs will be presented. This show will help the students to seek their careers in the industry or pursue for the higher studies.

The Faculty members will also display their commercial and research related work/projects in the Open House.

2) Industrial and Commercial Stalls

Our esteemed guests/visitors from Industry/Organizations are welcome to put up their stalls of their commercial products. They can market their products on the occasion as well give technical demonstrations to the visitors. They will be provided space and help for this purpose on "first come first serve basis".

3) Opportunity to meet with Experts from the Industry and Academia

Engineers, Leaders and dignitaries from Industries/Organizations, Scholars from Academia and students will be present during this occasion to exchange ideas, discuss issues, mark future course of R&D work, etc.

4) Talent Hunt

By organizing Open House, Faculty will provide a platform to their students to interact with professionals from industry and R&D organizations. Thus professionals will have an opportunity to judge technical and communication skills of our students from their work. It will give our students a chance to seek job interviews.

The parents of students are encouraged to see their children's R & D Projects. We welcome you all, and would be looking forward to see you on July 14th 2021, at Quaid e Azam Auditorium, International Islamic University, Faisal Mosque Campus Islamabad.
